

with his/her employer and/or instructor on the assembly of alarm valve trim. The competitor will be judged on all aspects of installation with a strong emphasis on safety and procedure.

Tools Provided

Each competitor should bring only the tools listed below to the competition. Tools may be examined prior to the practical performance test and additional tools will be stored until the competition has concluded.

10-inch crescent wrench
8- or 10-inch pipe wrench
12- or 18-inch pipe wrench
Torpedo level
File, to clean pipe ends
420 Channellock pliers

25-foot tape measure
Socket set with deep set
sockets and ratchet
10-inch channel locks
Hacksaw with new blade

The afternoon prior to the competition each competitor will be given the opportunity to use the 2 ½" pipe hand cutters, threading machine and groover provided by Wheeler-Rex.

Sample Score Sheet

The following sample score sheet is provided to give competitors an *example* of the criteria that may be included in the practical performance test. **However, this score sheet is not intended to act as a study guide in preparation or to imply specific criteria that will be judged during the actual practical performance**
